RA 6300 iQ

ALPHA iQ™ PRO

1 PERSONALISED CLEANING

With its **Sensor Nav System™**, the **ALPHA iQ™** robot cleaner identifies the configuration of your pool to optimise its movements and cleaning time. Its pressure sensor provides superior wall climbing and waterline cleaning according to the depth of the pool.

2 EFFECTIVE SUCTION

Its patented **cyclone suction** is extremely powerful and long-lasting. Thanks to its extra-large suction capacity and very fine filtration system, the **ALPHA iQ™** optimally collects all types of debris.

3 EASY-TO-USE

Thanks to its patented **Lift System**, **ALPHA iQ™** is lighter when removing it from the water. Its simple access to its filter and the visibility offered by its transparent window make it easy-to-use in all circumstances.

4 INTUITIVE CONTROLS

Monitor cleaning progress at any time through the intuitive interface of the **iAquaLink™** application. **ALPHA iQ™** is upgradeable thanks to possible optimisations and automatic remote updates.
